In 2026, airfares remain highly dynamic, and while "Tuesday afternoons" are a classic suggestion for finding deals, real-time demand shifts mean a live agent can often spot a price drop that hasn't hit the public search engines yet. To secure the cheapest last-minute fare, consider flying into a secondary airport or choosing a flight with a short connection rather than a direct route, as these segments are frequently priced more competitively to fill the plane. In early 2026, United Airline continues to allow immediate ticketing of award seats as long as there is inventory, making it possible to fly using miles for an unplanned emergency or spontaneous getaway. By booking with loyalty programs over the phone, you can also ask an agent to scan nearby airports to find the absolute lowest mileage requirement, which might be significantly less than the "Anytime" rates shown on the app. Be mindful of United Airline

While Basic Economy is often the cheapest option, it generally does not allow for any modifications, meaning a small extra investment in a standard ticket could save you the entire cost of the fare if your plans shift again. To avoid last-minute booking fees, it is best to book your ticket at least two hours before departure; however, if you are already on your way to the airport, a phone agent can often "hold" a fare for you to finalize at the ticket counter.
